

Mineral Economics & Evaluations

VISION

KB-MIC's vision is to develop and maintain a position as the distinguished geological consultancy of choice for both our employees and clients. Our focus will be primarily on Green and Brown field exploration in Africa.

We are considered "Competent Persons" by internationally recognized resource reporting standards (SAMREC, Ni43-101, and JORC) for Coal, Gold and Platinum Group Metals. Other commodities related experience includes Uranium, Copper, Iron-ore and Manganese.

CORE COMPETENCIES

KB-MIC's competitive advantage lies in its ability to offer clients integrated services from target generation through to CPR documentation for public companies.

Mineral Economics & Evaluations

Mineral economics is the study of the business and economic aspects of natural resource extraction and use. More recently this definition has been incorporating aspects of sustainable development in the minerals industry. Mineral economics involves studying topics in economic and financial analysis that are developed to meet the special needs of the mineral resources industries.

Services Include:

- Market surveys for mineral products
- Country reports
- Mineral valuations
- Project identification for investors
- Commodity Analysis
